

Jack Roybal

Software Engineer

“ That brain of mine is something more than merely mortal; as time will show. ”

Ada Lovelace

Versatile **Frontend Developer** passionate about creating exceptional user experiences while maintaining a keen eye on the entire application ecosystem. My **full-stack development** capabilities allow for a holistic approach to problem-solving, from user interface to database. Furthermore, my understanding of core **cybersecurity concepts** ensures I design and implement secure, resilient solutions that protect valuable data.

Experience

Frontend Developer

African Marine Conservation Organization

Nov 2023 - Present

Remote | Dizangue, Cameroon

Freelance Mod Developer

JRoybalDev

Aug 2019 - May 2022

Norwalk, California

Skills

Design

Web Design

Mobile Design

User Experience

• Wireframing

• Prototyping

• Testing

Design System

Development

React JS

• Daisy UI

• GSAP

• Framer

Type Script

Next JS

Python

CSS

JS

Databases & ORMS

PostgresSQL

• SQLAlchemy

• Sequelize

• Prisma

Database Design

Django

MongoDB

Cloud & DevOps

Docker

AWS S3

Linux CLI

Google Cloud

Oracle

Firebase

Security & Operations

Incident Management

• Security Frameworks & Controls

• SIEM Tools

• Network Security

Code Debugging

Education

Cerritos College

CIS: Programmer - AST

Present

Coursera

Google Cybersecurity Certificate

Jun 2025

App Academy

Software Engineering Bootcamp

Jun 2023

Latest projects

African Marine Conservation

A fully built website made for the African Marine Conservation Organization (AMCO).

View Project

Watchboxd

A user-friendly website designed for movie enthusiasts to track, rate, and review films
